

Sitting the 11+ in September?

Here's how to use the next 6 months...

Exams are only 6 months away!

Use this holiday to cover all of the curriculums on Atom, across English, maths, verbal reasoning and non-verbal reasoning.

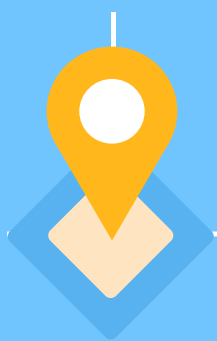

Consistency is key in this term!

Aim for 20-30 minutes 4 times a week on Atom.

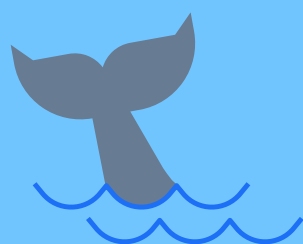

Book a call [here](#) with one of our education experts:

We'll analyse your child's data and let you know which areas they need to focus on.

4 months to go!

Your child should complete one mock test in each subject at the start of the holidays. Use the results from these to set **custom practices** for your child.

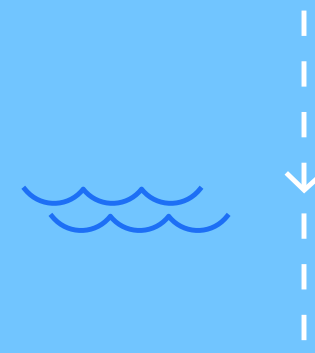

3 months to go!

Set your child a mock test once a week from here on. Familiarity with the exam format ensures your child feels confident on test day!

Keep learning targeted!

In this term, set your child the challenge of completing 4 custom practices a week. Encourage them to pick the topics to include!

You are here!

Register your child for Atom's free **11+ Preparation course** for energetic lessons with our expert teachers.

2 months to go!

Book a follow-up call with one of our **education experts**:

We'll design a summer study plan to keep your child on top!

Year 6 has arrived!

Positive conversations with your child, coupled with 20-30 minutes a day on Atom, will give them the best set-up for success.

Best of luck!

If your child is sitting the 11+ in 2022, start your free trial of Atom today at
