

Adding and Subtracting Fractions

Use **equivalent fractions** to help you solve the following problems.

1 Complete the sum by drawing the answer.

2 $\frac{1}{2} - \frac{1}{10} = \square$

3 $\frac{13}{12} - \frac{2}{3} = \square$

4 $\frac{1}{5} + \frac{5}{6} = \square$

5 $\frac{2}{9} + \frac{4}{6} - \frac{13}{18} = \square$

Adding and Subtracting Fractions **Answers**

1 Complete the sum by drawing the answer.

2 $\frac{1}{2} - \frac{1}{10} = \frac{2}{5}$

3 $\frac{13}{12} - \frac{2}{3} = \frac{5}{12}$

4 $\frac{1}{5} + \frac{5}{6} = \frac{31}{30}$

5 $\frac{2}{9} + \frac{4}{6} - \frac{13}{18} = \frac{1}{6}$
