

British Science Week:

Connections

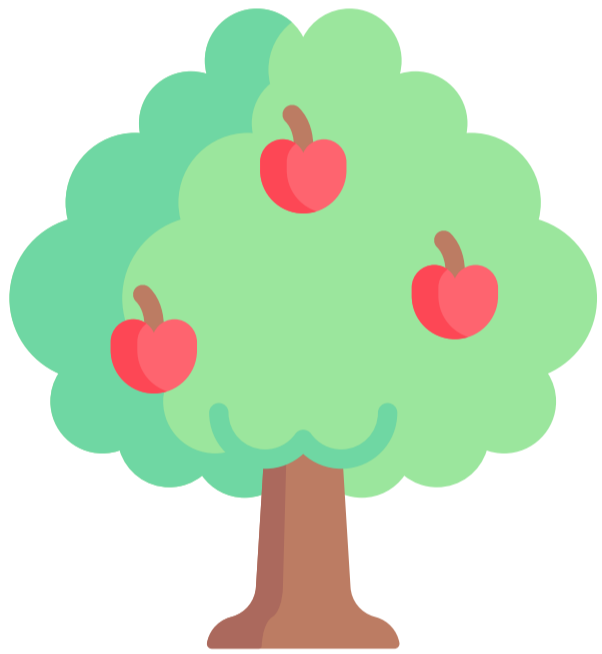

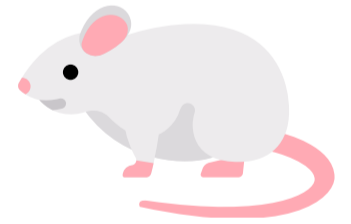

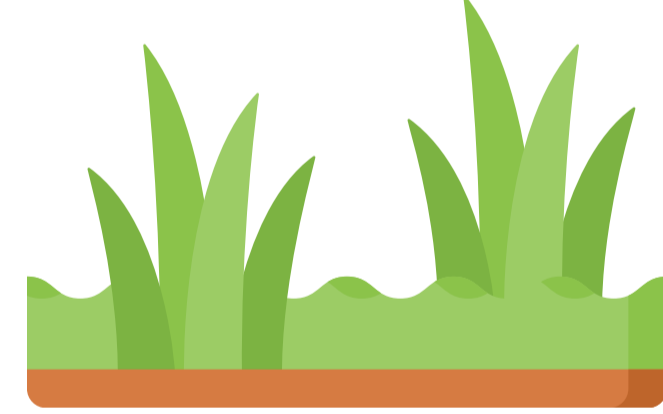

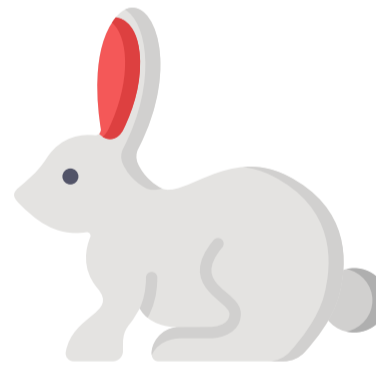

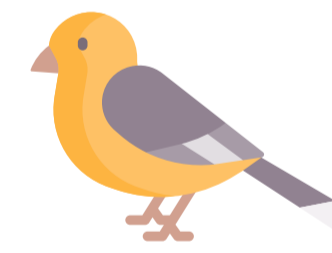

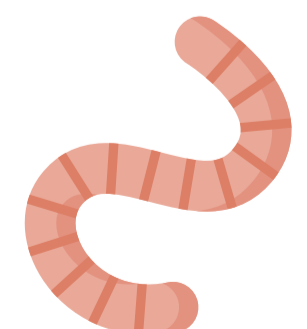

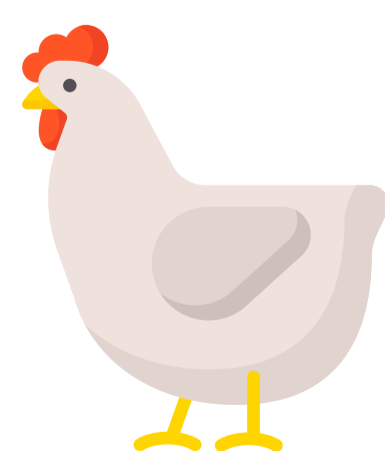

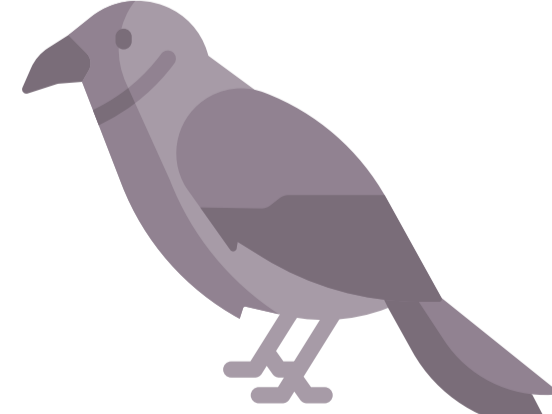

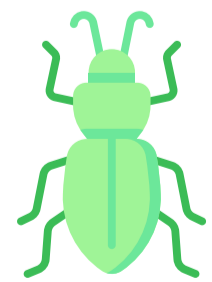

The theme for British Science Week 2023 is Connections.

Animals and plants depend on each other for survival. This is a form of connection. One way of showing this connection is through a food chain or food web.

Cut out the animal and plant cards and arrange them into food chains or food webs. Remember to use arrows (→) to show what an animal or plant is eaten by.

 Owl	 Apple tree	 Cow	 Hedgehog	 Wheat
 Mouse	 Horse	 Grass	 Rabbit	 Robin
 Cabbage	 Goat	 Bee	 Bat	 Sheep
 Worm	 Chicken	 Fox	 Crow	 Beetle

Share your finished food chains with submissions@atomlearning.com for a chance to appear on our social media!
